Levanderiella, новое название для *Levanderia* Likharev et Wiktor, 1980 (Pulmonata, Parmacellidae)

A. A. ШИЛЕЙКО

Институт проблем эволюции им. А.Н.Северцова РАН. Ленинский проспект 33, 119071 Москва, РОССИЯ.

Likharev and Wiktor [1980: 348] erected a new subgenus *Levanderia* (genus *Candaharia*) with type species *Parmacella levanderi* Simroth, 1901 (original designation). I used this name in my Treatise [Schileyko, 2003: 1456].

However this name has been preoccupied by Sturany [1905: 134] for a genus of Galeommatidae (Bivalvia) with type species *Levanderia erythraeensis* Sturany, 1905 (original designation).

Therefore, here I suggest a new name *Levanderiella* for

Levanderia Likharev et Wiktor, 1980, with the same type species.

I am deeply indebted to Dr. V. Millard, who turned my attention to the fact of homonymy.
